at UC Irvine -- User-related research for ages 2-7 in moral and empathy testing.

About Me

I am passionate about user centered design and I believe functionality breeds its own unique aesthetic. I like to take into consideration all different aspects of what design can do for a client before starting any project.

In the past I've taken on several roles as a UX/UI designer and creative lead. I'm constantly looking to improve my skills both as a designer as well as a developer.
